MITRE ATLAS | AML.T0005.001 - Train Proxy via Replication

Entry Information

ID:
AML.T0005.001

Type:
Sub-Technique

Name:
Train Proxy via Replication

URL:
https://atlas.mitre.org/techniques/AML/T0005/001/

Parent Technique:
AML.T0005

Maturity:
Demonstrated

Created:
2021-05-13

Modified:
2021-05-13

Description

Adversaries may replicate a private model.
By repeatedly querying the victim's [AI Model Inference API Access](/techniques/AML.T0040), the adversary can collect the target model's inferences into a dataset.
The inferences are used as labels for training a separate model offline that will mimic the behavior and performance of the target model.

A replicated model that closely mimic's the target model is a valuable resource in staging the attack.
The adversary can use the replicated model to [Craft Adversarial Data](/techniques/AML.T0043) for various purposes (e.g. [Evade AI Model](/techniques/AML.T0015), [Spamming AI System with Chaff Data](/techniques/AML.T0046)).
