MITRE ATLAS | AML.T0011.000 - Unsafe AI Artifacts

Entry Information

ID:
AML.T0011.000

Type:
Sub-Technique

Name:
Unsafe AI Artifacts

URL:
https://atlas.mitre.org/techniques/AML/T0011/000/

Parent Technique:
AML.T0011

Maturity:
Realized

Created:
2021-05-13

Modified:
2025-04-09

Description

Adversaries may develop unsafe AI artifacts that when executed have a deleterious effect.
The adversary can use this technique to establish persistent access to systems.
These models may be introduced via a [AI Supply Chain Compromise](/techniques/AML.T0010).

Serialization of models is a popular technique for model storage, transfer, and loading.
However, this format without proper checking presents an opportunity for code execution.
