MITRE ATLAS | AML.T0011.001 - Malicious Package

Entry Information

ID:
AML.T0011.001

Type:
Sub-Technique

Name:
Malicious Package

URL:
https://atlas.mitre.org/techniques/AML/T0011/001/

Parent Technique:
AML.T0011

Maturity:
Realized

Created:
2025-03-12

Modified:
2025-03-12

Description

Adversaries may develop malicious software packages that when imported by a user have a deleterious effect.

Malicious packages may behave as expected to the user. They may be introduced via [AI Supply Chain Compromise](/techniques/AML.T0010). They may not present as obviously malicious to the user and may appear to be useful for an AI-related task.
