MITRE ATLAS | AML.T0016.000 - Adversarial AI Attack Implementations

Entry Information

ID:
AML.T0016.000

Type:
Sub-Technique

Name:
Adversarial AI Attack Implementations

URL:
https://atlas.mitre.org/techniques/AML/T0016/000/

Parent Technique:
AML.T0016

Maturity:
Realized

Created:
2021-05-13

Modified:
2025-04-09

Description

Adversaries may search for existing open source implementations of AI attacks. The research community often publishes their code for reproducibility and to further future research. Libraries intended for research purposes, such as CleverHans, the Adversarial Robustness Toolbox, and FoolBox, can be weaponized by an adversary. Adversaries may also obtain and use tools that were not originally designed for adversarial AI attacks as part of their attack.
