MITRE ATLAS | AML.T0018.001 - Modify AI Model Architecture

Entry Information

ID:
AML.T0018.001

Type:
Sub-Technique

Name:
Modify AI Model Architecture

URL:
https://atlas.mitre.org/techniques/AML/T0018/001/

Parent Technique:
AML.T0018

Maturity:
Demonstrated

Created:
2021-05-13

Modified:
2024-04-11

Description

Adversaries may directly modify an AI model's architecture to re-define it's behavior. This can include adding or removing layers as well as adding pre or post-processing operations.

The effects could include removing the ability to predict certain classes, adding erroneous operations to increase computation costs, or degrading performance. Additionally, a separate adversary-defined network could be injected into the computation graph, which can change the behavior based on the inputs, effectively creating a backdoor.
