MITRE ATLAS | AML.T0024.002 - Extract AI Model

Entry Information

ID:
AML.T0024.002

Type:
Sub-Technique

Name:
Extract AI Model

URL:
https://atlas.mitre.org/techniques/AML/T0024/002/

Parent Technique:
AML.T0024

Maturity:
Feasible

Created:
2021-05-13

Modified:
2025-12-23

Description

Adversaries may extract a functional copy of a private model.
By repeatedly querying the victim's [AI Model Inference API Access](/techniques/AML.T0040), the adversary can collect the target model's inferences into a dataset.
The inferences are used as labels for training a separate model offline that will mimic the behavior and performance of the target model.

Adversaries may extract the model to avoid paying per query in an artificial-intelligence-as-a-service (AIaaS) setting.
Model extraction is used for [AI Intellectual Property Theft](/techniques/AML.T0048.004).
