MITRE ATLAS | AML.T0043.001 - Black-Box Optimization

Entry Information

ID:
AML.T0043.001

Type:
Sub-Technique

Name:
Black-Box Optimization

URL:
https://atlas.mitre.org/techniques/AML/T0043/001/

Parent Technique:
AML.T0043

Maturity:
Demonstrated

Created:
2021-05-13

Modified:
2021-05-13

Description

In Black-Box attacks, the adversary has black-box (i.e. [AI Model Inference API Access](/techniques/AML.T0040) via API access) access to the target model.

With black-box attacks, the adversary may be using an API that the victim is monitoring.

These attacks are generally less effective and require more inferences than [White-Box Optimization](/techniques/AML.T0043.000) attacks, but they require much less access.
