MITRE ATLAS | AML.T0052.000 - Spearphishing via Social Engineering LLM

Entry Information

ID:
AML.T0052.000

Type:
Sub-Technique

Name:
Spearphishing via Social Engineering LLM

URL:
https://atlas.mitre.org/techniques/AML/T0052/000/

Parent Technique:
AML.T0052

Maturity:
Demonstrated

Created:
2023-10-25

Modified:
2023-10-25

Description

Adversaries may turn LLMs into targeted social engineers.

LLMs are capable of interacting with users via text conversations.

They can be instructed by an adversary to seek sensitive information from a user and act as effective social engineers.

They can be targeted towards particular personas defined by the adversary.

This allows adversaries to scale spearphishing efforts and target individuals to reveal private information such as credentials to privileged systems.
