MITRE ATLAS | AML.T0091.000 - Application Access Token

Entry Information

ID:
AML.T0091.000

Type:
Sub-Technique

Name:
Application Access Token

URL:
https://atlas.mitre.org/techniques/AML/T0091/000/

Parent Technique:
AML.T0091

Maturity:
Demonstrated

ATT&CK Ref:
T1550.001 https://attack.mitre.org/techniques/T1550/001/

Created:
2025-10-28

Modified:
2025-12-23

Description

Adversaries may use stolen application access tokens to bypass the typical authentication process and access restricted accounts, information, or services on remote systems. These tokens are typically stolen from users or services and used in lieu of login credentials.

Application access tokens are used to make authorized API requests on behalf of a user or service and are commonly used to access resources in cloud, container-based applications, software-as-a-service (SaaS), and AI-as-a-service(AIaaS). They are commonly used for AI services such as chatbots, LLMs, and predictive inference APIs.
