MITRE ATLAS | AML.T0001 - Search Open AI Vulnerability Analysis

Entry Information

ID:
AML.T0001

Type:
Technique

Name:
Search Open AI Vulnerability Analysis

URL:
https://atlas.mitre.org/techniques/AML/T0001/

Tactics:
AML.TA0002

Maturity:
Demonstrated

Created:
2021-05-13

Modified:
2025-04-17

Description

Much like the [Search Open Technical Databases](/techniques/AML.T0000), there is often ample research available on the vulnerabilities of common AI models. Once a target has been identified, an adversary will likely try to identify any pre-existing work that has been done for this class of models.

This will include not only reading academic papers that may identify the particulars of a successful attack, but also identifying pre-existing implementations of those attacks. The adversary may obtain [Adversarial AI Attack Implementations](/techniques/AML.T0016.000) or develop their own [Adversarial AI Attacks](/techniques/AML.T0017.000) if necessary.
