MITRE ATLAS | AML.T0013 - Discover AI Model Ontology

Entry Information

ID:
AML.T0013

Type:
Technique

Name:
Discover AI Model Ontology

URL:
https://atlas.mitre.org/techniques/AML/T0013/

Tactics:
AML.TA0008

Maturity:
Demonstrated

Created:
2021-05-13

Modified:
2025-04-09

Description

Adversaries may discover the ontology of an AI model's output space, for example, the types of objects a model can detect.

The adversary may discovery the ontology by repeated queries to the model, forcing it to enumerate its output space.

Or the ontology may be discovered in a configuration file or in documentation about the model.

The model ontology helps the adversary understand how the model is being used by the victim.

It is useful to the adversary in creating targeted attacks.
