MITRE ATLAS | AML.T0015 - Evade AI Model

Entry Information

ID:
AML.T0015

Type:
Technique

Name:
Evade AI Model

URL:
https://atlas.mitre.org/techniques/AML/T0015/

Tactics:
AML.TA0004, AML.TA0007, AML.TA0011

Maturity:
Realized

Created:
2021-05-13

Modified:
2025-11-04

Description

Adversaries can [Craft Adversarial Data](/techniques/AML.T0043) that prevents an AI model from correctly identifying the contents of the data or [Generate Deepfakes](/techniques/AML.T0088) that fools an AI model expecting authentic data.

This technique can be used to evade a downstream task where AI is utilized. The adversary may evade AI-based virus/malware detection or network scanning towards the goal of a traditional cyber attack. AI model evasion through deepfake generation may also provide initial access to systems that use AI-based biometric authentication.
