MITRE ATLAS | AML.T0024 - Exfiltration via AI Inference API

Entry Information

ID:
AML.T0024

Type:
Technique

Name:
Exfiltration via AI Inference API

URL:
https://atlas.mitre.org/techniques/AML/T0024/

Tactics:
AML.TA0010

Maturity:
Feasible

Created:
2021-05-13

Modified:
2025-04-09

Description

Adversaries may exfiltrate private information via [AI Model Inference API Access](/techniques/AML.T0040).
AI Models have been shown leak private information about their training data (e.g. [Infer Training Data Membership](/techniques/AML.T0024.000), [Invert AI Model](/techniques/AML.T0024.001)).
The model itself may also be extracted ([Extract AI Model](/techniques/AML.T0024.002)) for the purposes of [AI Intellectual Property Theft](/techniques/AML.T0048.004).

Exfiltration of information relating to private training data raises privacy concerns.
Private training data may include personally identifiable information, or other protected data.
