MITRE ATLAS | AML.T0034 - Cost Harvesting

Entry Information

ID:
AML.T0034

Type:
Technique

Name:
Cost Harvesting

URL:
https://atlas.mitre.org/techniques/AML/T0034/

Tactics:
AML.TA0011

Maturity:
Feasible

Created:
2021-05-13

Modified:
2025-04-09

Description

Adversaries may target different AI services to send useless queries or computationally expensive inputs to increase the cost of running services at the victim organization.

Sponge examples are a particular type of adversarial data designed to maximize energy consumption and thus operating cost.
