AML.TA0013

Maturity:
Realized

ATT&CK Ref:
T1552 https://attack.mitre.org/techniques/T1552/

Created:
2023-10-25

Modified:
2024-04-29

Description

Adversaries may search compromised systems to find and obtain insecurely stored credentials.

These credentials can be stored and/or misplaced in many locations on a system, including plaintext files (e.g. bash history), environment variables, operating system, or application-specific repositories (e.g. Credentials in Registry), or other specialized files/artifacts (e.g. private keys).
