MITRE ATLAS | AML.T0056 - Extract LLM System Prompt

Entry Information

ID:
AML.T0056

Type:
Technique

Name:
Extract LLM System Prompt

URL:
https://atlas.mitre.org/techniques/AML/T0056/

Tactics:
AML.TA0010

Maturity:
Feasible

Created:
2023-10-25

Modified:
2025-03-12

Description

Adversaries may attempt to extract a large language model's (LLM) system prompt. This can be done via prompt injection to induce the model to reveal its own system prompt or may be extracted from a configuration file.

System prompts can be a portion of an AI provider's competitive advantage and are thus valuable intellectual property that may be targeted by adversaries.
