AML.TA0004

Maturity:
Demonstrated

ATT&CK Ref:
T1189 https://attack.mitre.org/techniques/T1189/

Created:
2025-04-16

Modified:
2025-04-17

Description

Adversaries may gain access to an AI system through a user visiting a website over the normal course of browsing, or an AI agent retrieving information from the web on behalf of a user. Websites can contain an [LLM Prompt Injection](/techniques/AML.T0051) which, when executed, can change the behavior of the AI model.

The same approach may be used to deliver other types of malicious code that don't target AI directly (See [Drive-by Compromise in ATT&CK](https://attack.mitre.org/techniques/T1189/)).
