MITRE ATLAS | AML.T0079 - Stage Capabilities

Entry Information

ID:
AML.T0079

Type:
Technique

Name:
Stage Capabilities

URL:
https://atlas.mitre.org/techniques/AML/T0079/

Tactics:
AML.TA0003

Maturity:
Demonstrated

ATT&CK Ref:
T1608 https://attack.mitre.org/techniques/T1608/

Created:
2025-04-16

Modified:
2025-04-17

Description

Adversaries may upload, install, or otherwise set up capabilities that can be used during targeting. To support their operations, an adversary may need to take capabilities they developed ([Develop Capabilities](/techniques/AML.T0017)) or obtained ([Obtain Capabilities](/techniques/AML.T0016)) and stage them on infrastructure under their control. These capabilities may be staged on infrastructure that was previously purchased/rented by the adversary ([Acquire Infrastructure](/techniques/AML.T0008)) or was otherwise compromised by them. Capabilities may also be staged on web services, such as GitHub, model registries, such as Hugging Face, or container registries.

Adversaries may stage a variety of AI Artifacts including poisoned datasets ([Publish Poisoned Datasets](/techniques/AML.T0019), malicious models ([Publish Poisoned Models](/techniques/AML.T0058), and prompt injections. They may target names of legitimate companies or products, engage in typosquatting, or use hallucinated entities ([Discover LLM Hallucinations](/techniques/AML.T0062)).
