MITRE ATLAS | AML.T0090 - OS Credential Dumping

Entry Information

ID:
AML.T0090

Type:
Technique

Name:
OS Credential Dumping

URL:
https://atlas.mitre.org/techniques/AML/T0090/

Tactics:
AML.TA0013

Maturity:
Demonstrated

ATT&CK Ref:
T1003 https://attack.mitre.org/techniques/T1003/

Created:
2025-10-27

Modified:
2025-11-04

Description

Adversaries may extract credentials from OS caches, application memory, or other sources on a compromised system. Credentials are often in the form of a hash or clear text, and can include usernames and passwords, application tokens, or other authentication keys.

Credentials can be used to perform [Lateral Movement](/tactics/AML.TA0015) to access other AI services such as AI agents, LLMs, or AI inference APIs. Credentials could also give an adversary access to other software tools and data sources that are part of the AI DevOps lifecycle.
