MITRE ATLAS | AML.T0104 - Publish Poisoned AI Agent Tool

Entry Information

ID:
AML.T0104

Type:
Technique

Name:
Publish Poisoned AI Agent Tool

URL:
https://atlas.mitre.org/techniques/AML/T0104/

Tactics:
AML.TA0003

Maturity:
Demonstrated

Created:
2026-01-30

Modified:
2026-02-05

Description

Adversaries may create and publish poisoned AI agent tools. Poisoned tools may contain an [LLM Prompt Injection](/techniques/AML.T0051), which can lead to a variety of impacts.

Tools may be published to open source version control repositories (e.g. GitHub, GitLab), to package registries (e.g. npm), or to repositories specifically designed for sharing tools (e.g. OpenClaw Hub). These registries may be largely unregulated and may contain many poisoned tools [\[1\]][1].
